

K6BEN-ATV

427.25MHz (cable ch 58)

an ATN affiliated station

Our Founder, Glen K6GNG (SK)

Amateur Television for Silicon Valley

K6BEN is a amateur television station repeater. Input is 1255 MHz and output is 427.25 MHz (both fastscan). Look for the station on channel 58 with your cable ready TV set. For best results, point a UHF beam (vertically polarized) toward Mt Hamilton or east San Jose foothills. J-poles work quite well also. With good line-of-sight, rabbit ears will have good reception. Talk-in frequencies are 145.510 MHz simplex, and our repeater at 443.125 MHz, plus offset, PL of 123.0.

Weekly Net, Wednesday at 8:30 pm Our weekly video net is every Wednesday at 8:30 pm, visitors welcome! If you cannot transmit video, please check in on 145.510 simplex or on repeater 443.125+, PL 123.0. Non-hams are encouraged to watch the net.

Monthly Meeting every third Saturday at 11:00 am We meet every third Saturday at 11:00 am at Harry's Hofbrau on Saratoga Ave (next to Garden City casino) in San Jose, near highway 280 and Saratoga Ave. Visitors and non-hams welcome!
